

Kids' snowboard size chart

Stand the board on its tail: it should reach between the child's chest and chin.

Nearer the chest for beginners, nearer the chin for confident or heavier kids.

Age	Height	Weight	cm · kg	Board length
4	3'4"	35 lb	102 · 16	80–90 cm
6	3'9"	46 lb	114 · 21	90–100 cm
8	4'2"	57 lb	127 · 26	100–110 cm
10	4'7"	71 lb	140 · 32	110–125 cm
12	4'11"	90 lb	149 · 41	125–135 cm
14	5'5"	112 lb	164 · 51	140–150 cm

Go by size, not age

Height and weight matter more than age: children the same age vary a lot.

Room to grow

Pick within the range, not above it: a board that's too long is hard to turn.
